nCircle Products and Solutions

Automated Security & Compliance Auditing

nCircle offers the world's most comprehensive suite of products for security and compliance auditing. The fully integrated best-of-breed products set the industry standard for comprehensive asset discovery, accuracy, depth of coverage, reporting and benchmarking. nCircle's products provide tremendous cost savings through the comprehensive suite and agentless design and time savings through unified risk and compliance reporting. nCircle offers two integrated product lines - nCircle Suite360™ and nCircle Benchmark.

nCircle Suite360

nCircle's flagship offering, Suite360, is comprised of a fully integrated, best-in-class agentless product line for auditing the entire information technology stack across a global network. With an ever-growing library of over 40,000 checks, Suite360 offers the greatest breadth and depth of coverage for automatically discovering vulnerabilities, applications, services, auditing configuration compliance and monitoring file integrity across an enterprise's entire network.

nCircle Suite360 products include:

- IP360™ for vulnerability management
- Configuration Compliance Manager (CCM)™ for configuration auditing
- WebApp360™ for web application scanning
- File Integrity Monitor™ for file integrity monitoring and compliance
- Certified PCI Scan Service™ for on demand, self-service PCI compliance
- Suite360 Intelligence Hub™ for IT governance, risk and compliance (ITGRC) analytics and reporting
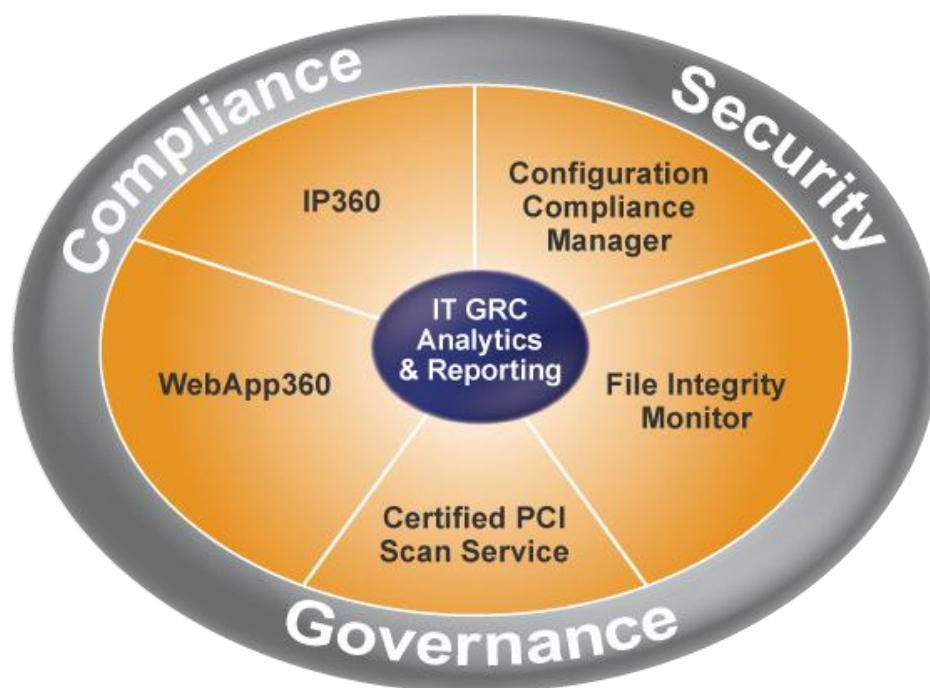

nCircle Benchmark

nCircle Benchmark is nCircle's newest offering that delivers security and compliance scorecards, metrics and industry benchmarks for measuring an organization's performance against internal goals and against the performance of industry peers. This extraordinary and revolutionary solution enables performance comparison of an organization's vulnerability management, patch management, configuration auditing, identity and access management, anti-virus and endpoint protection programs against industry benchmarks that are continuously updated by the organizations themselves. Learn more about nCircle Benchmark.
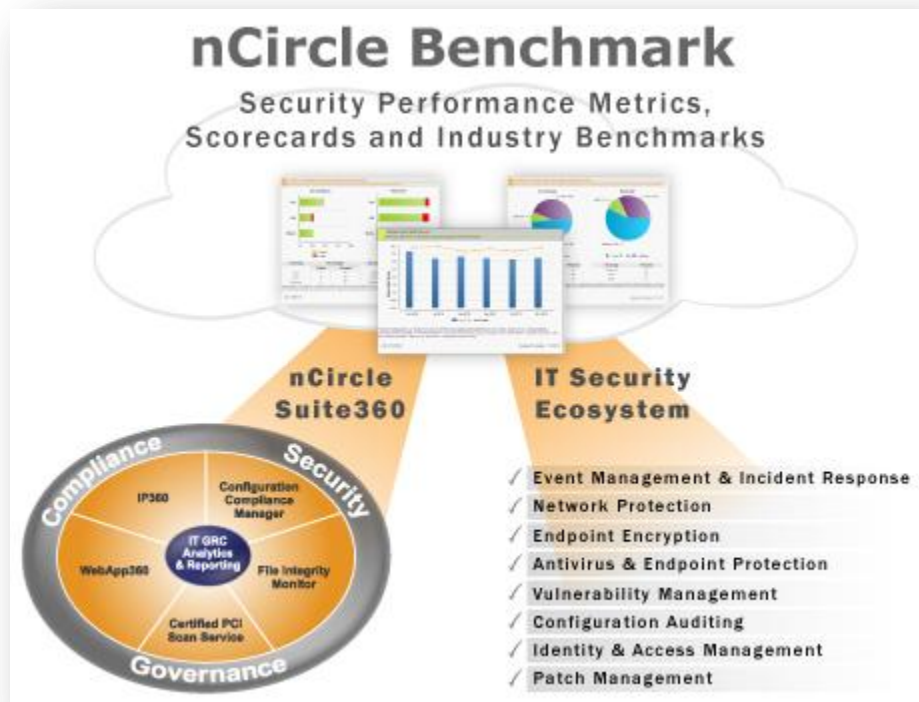

nCircle solutions are designed for organizations of all sizes and any deployment strategy. Offering on premise hardware or virtualized appliances or software, cloud-based deployments, managed service or a combination, nCircle is designed to meet your needs.
